SUMMARY

I am a Mobile Developer with **3+ years of experience** building scalable **Android** and **Flutter** applications. Skilled in clean architectures, real-time data integration, and user-focused solutions, I bring both technical expertise and a collaborative mindset. My career goal is to become a team leader in mobile development—managing the full lifecycle of applications, fostering collaboration, and guiding teams to deliver innovative and impactful digital products.

EDUCATION

BS IN COMPUTER ENGINEERING, Kirikkale University

09/2018 – 06/2022 | Kırıkkale, Turkey

PROFESSIONAL EXPERIENCE

Mobile Developer, Freelance

01/2025 – Present | Turkey

- **Converted designs and wireframes** into high-quality, reusable **Flutter** and **Firestore** code, ensuring **responsive** and **performance-optimized applications**.
- **Designed, built, and maintained** high-performance, scalable code using **Kotlin** and **Java** for Android development.
- Integrated **Firestore services (Auth, Firestore, Realtime Database)** to enable **real-time data synchronization**, optimizing performance across Android devices.
- Identified and resolved **performance bottlenecks** in **Flutter Web**, improving **memory management** and optimizing **permission handling** for a smoother user experience.
- Implemented **MVVM architecture** with **ViewModel** and **LiveData**, following best practices for scalable and maintainable code.
- Enhanced **UI design** following **Google's Android design principles**, ensuring responsive and intuitive interfaces across different screen sizes.
- Integrated **payment systems** such as **Stripe** and **Google Pay** to facilitate secure in-app transactions, improving user experience and app functionality.

Mobile Developer, PEAKUP

01/2024 – 01/2025 | İstanbul, Turkey

- **Worked at PEAKUP**, a tech company delivering IT and software solutions to 600+ clients and 600,000+ users across EMEA.
- Developed 4 cross-platform mobile apps (SIGNandGO, Noa, Velocity, PassGate) on **Google Play Store** and **App Store**.
- Designed dynamic, responsive UIs with state management using **Bloc**, **GetX**, and **Provider** for seamless user experience.
- Integrated **RESTful APIs** for data exchange, authentication, and backend communication, ensuring real-time functionality.
- Built Envisense, an **IoT-based energy management platform** with **WebSocket** and **JWT authentication** to access 25+ microservices.
- Delivered Velocity, a push notification system with **Firestore Cloud Messaging** and offline support, increasing mobile usage by over **50%**.
- Developed SIGNandGO, a digital business card platform with **QR code-based sharing** and multilingual support (EN/TR).
- Integrated native **Contact Service** features for Android (**Kotlin**) and iOS (**Swift**).
- Created PassGate, a secure **WebView** solution with **SSL certificate validation** and dynamic language switching.
- Increased app visibility and user acquisition by **65%** through **ASO** efforts.
- Collaborated with **QA** and support teams to ensure stable releases and ongoing updates.

Mobile Application Developer, EGY Yazılım

11/2022 – 12/2023 | Ankara, Turkey

- Developed native Android applications using **Kotlin** and **Java**, including offline storage solutions with **SQLite** and **Room** for reliable data access.
- Integrated **REST APIs** using **Retrofit** and **Gson**, ensuring secure data exchange between Android apps and server-side services.
- Optimized threading and performance, resolving issues related to app responsiveness and memory usage.
- Designed UI components following Android's design principles, ensuring a consistent and user-friendly experience across a variety of screen sizes and Android versions.

- Applied **MVVM** architecture to keep the code modular, testable, and easier to maintain over time.
- Improved app performance through rigorous **debugging**, optimizing network requests, and using background threading for long-running tasks.
- **Worked with NFC cards** to track **entry and exit** events, enabling efficient data capture and real-time processing.

Intern, Infracsis Siber Mühendislik 

07/2022 – 10/2022 | Ankara, Turkey

- Assisted in developing secure mobile applications by following **OWASP Top 10** security principles.
- Gained hands-on experience in **UI/UX design** principles and performance optimization for mobile apps.

Junior Software Developer,

11/2021 – 05/2022 | Kırıkkale, Turkey

Department of Information Technology 

- Developed a **Flutter-based student engagement application** using Bloc state management and iterative UX design principles.
- Applied **Firebase Authentication & Firestore** for real-time data handling and user management.

PROJECT

CV 

- Built a Flutter application with **Firebase real-time sync** and **Provider** state management.
- Developed an **AI-powered resume & cover letter generator** to automatically create personalized letters based on CV data.
- Integrated **share, copy-to-clipboard, and email sending features** using Share Plus, Clipboard, and Url Launcher.
- Implemented **animations** (FadeTransition, AnimatedRotation, AnimatedContainer) for smooth UI/UX.
- Designed a **modern, responsive UI** with gradients, shadows, and Material Design components.
- Added robust **error handling** with animated Snackbars for improved user experience.

My Profile 

- Built with Flutter + Firebase (Auth, Firestore, Storage) using **BLoC architecture**.
- Developed **real-time social feed**, authentication system, and profile management features.

NearBarber 

- Implemented **voice command recognition** using SpeechRecognizer API for hands-free interaction.
- Integrated a **chatbot system** supporting both text and image-based inputs.
- Applied **MVVM architecture** for scalable and maintainable code.
- Integrated **Firebase Realtime Database** for real-time data synchronization.
- Added **Google Maps SDK integration** to display nearby barbers with markers.
- Used **Navigation Component** for seamless and structured screen transitions.

SKILLS

- | | |
|---|--|
| <ul style="list-style-type: none"> • Languages: Kotlin, Java, Dart (Flutter), Swift • Android Development: Android SDK, Jetpack Compose, SQLite, Room, Firebase • Architectures & Patterns: MVVM, Dependency Injection (Hilt, Dagger) • State Management: Bloc, Provider, GetX • APIs: RESTful APIs, Retrofit, OkHttp • Performance: Memory optimization, Threading, App performance tuning • Storage: Offline storage (SQLite, Room), Secure Storage | <ul style="list-style-type: none"> • Version Control: Git, GitHub, Agile/Scrum, Jira • CI/CD: Azure DevOps, GitHub Actions • Testing: TDD, Unit Testing, UI Testing • UI Design: Material Design, Responsive UIs • Integration: Platform Channels, Google Maps SDK, Push Notifications (FCM), Payment systems (Stripe, Google Pay) |
